

**U.S. ENVIRONMENTAL PROTECTION AGENCY
POLLUTION/SITUATION REPORT
2015 Gold King Mine Release SITREP**

**UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
Region 8**

Subject: Situation Report #9
Gold King Mine Release
San Juan County, CO
Latitude: 37.8945 Longitude: -107.6384

From: Durango Unified Command (Situation Unit)

Date: 08/17/2015

Reporting Period: 08/16/2015 through 08/16/2015

Website: <http://www2.epa.gov/goldkingmine>

New information included in the SITREP is in bold text.

Executive Summary

On August 5, while investigating the Gold King Mine in Colorado, an EPA cleanup team triggered a release of mine wastewater into Cement Creek. The EPA is working closely with responders and local, state and tribal officials to monitor water contaminated by the release. The release's path flows through three of the EPA's regions - Region 8 (Colorado, Utah, Southern Ute Indian Tribe lands, and Ute Mountain Ute Tribe lands); Region 6 (New Mexico), and Region 9 (Navajo Nation). The EPA has activated its Emergency Operations System to ensure coordination among its regions, laboratories and national program offices in Washington, D.C. A Unified Command has been established in Durango CO, which includes the EPA, State of Colorado Office of Emergency Management (OEM), Southern Ute Indian Tribe, La Plata County, and San Juan Basin Health Department. The Ute Mountain Ute Tribe is an Administrative Agency in the UC. The EPA has established an Area Command in Durango CO, and that covers the Incident Command Post (ICP) Colorado (Colorado Unified Command), ICP New Mexico (New Mexico Unified Command), and the ICP South West (South West Unified Command).

Highlights, Key Updates/ Changes:

- On 8/18/2015 the EPA and CDPHE will be assessing the upper Animas River through the canyon.
- Based on past sample results, the EPA water surface quality sampling points have been reduced to five (3 in Silverton area and 2 in Durango area).

1. Introduction

1.1 Background

Site Number: A8K9RV

Contract Number:

D.O. Number:

Action Memo Date:

Response Authority: CERCLA

Response Type: Emergency

Response Lead: EPA

Incident Category:

NPL Status: not listed

Operable Unit:

Mobilization Date: 08/05/2015

Start Date: 08/05/15

Demob Date: TBD

Completion Date:

CERCLIS ID:

RCRIS ID:

ERNS No.:

State Notification: 08/05/15

On August 6, 2015 the La Plata County Sheriff issued an order closing the river to all watercraft. The Sheriff reopened the Animas River to recreational use at 12:00 pm on Friday August 14, 2015. The decision was made in conjunction with the San Juan Basin Public Health Department, the Colorado Department of Public Health and Environment (CDPHE) and the EPA. The Sheriff's order reopening the river was accompanied by a Health Advisory from San Juan Basin Health Department and CDPHE, which provides additional information to recreational users of the river.

At 2 pm on Friday, August 14 2015, the City of Durango resumed pumping water from the Animas River for further treatment. This decision was made in conjunction with the CDPHE. The City will continue to analyze water quality samples, based on pre-established protocols. The City has also lifted the outdoor irrigation restrictions, and encourages responsible outdoor irrigation.

1.1.1.1 Incident Category

1.1.2 Site Description

The Gold King Mine near Silverton, Colorado is a historic gold mine at approximately 11,300' elevation. The mine has a continuous discharge of acidic mine drainage that is a significant contributor of manganese, zinc, copper, and cadmium into the Cement Creek drainage of the Animas River watershed. The Gold King Mine has not had maintenance of the mine workings since 1991, and the workings have been inaccessible since 1995 when the mine portal collapsed.

The EPA Region 8 has been investigating the conditions to assess the on-going releases and incremental de-watering and removal of blockages to prevent blowouts.

1.1.2.1 Location - San Juan County, Colorado, La Plata County, Colorado, Southern Ute Indian Reservation and Ute Mountain Ute Tribe reservation.

1.1.2.2 Description of Threat

Mine waste water was released into Cement Creek and the Animas River. The volume of the release based on US Geological Survey (USGS) Cement Creek gaging station is estimated at three million gallons. The initial environmental concern was the pulse of contaminated water containing sediment and metals discharged in Cement Creek which flows into the Animas River through Durango, Colorado, and into New Mexico where it joins the San Juan River before flowing into Utah.

The leading edge of the release passed through Durango, Colorado, on Friday, August 7, 2015, and on August 8, 2015, it crossed the border into New Mexico where it eventually discharged into the San Juan River.

1.1.3 Site Inspection Results

Aerial and ground reconnaissance indicates that the plume associated with the Gold King Mine release has dissipated downstream and there is no leading edge of contamination visible in downstream sections of the San Juan River or Lake Powell.

The EPA is collecting samples and assessing water quality from Cement Creek and the Animas daily. Water sampling is occurring, and pH levels and dissolved concentrations of metals are being monitored.

1.2 Incident Objectives

- Continue sampling plan and develop strategy to evaluate and mitigate risks due to sediment in the river.
- Continue river assessment through water sampling.
- Effectively communicate with public and stakeholders utilizing a multi-faceted communication strategy to disseminate results.
- Ensure health and safety of the public and response management personnel.
- Develop a means to assess the economic impact upon affected communities
- Continued coordination with the Department of Agriculture (including state and local veterinarians) and the Colorado Extension.
- Continue management of adit discharge.
- Maintain stability of mine road to ensure access.
- Prepare for mine dump stabilization.
- Amend field sampling plan to include assessment of remote areas of the canyon by Tuesday 8/18/2015.
- Roll current well sampling effort into interim shallow groundwater monitoring plan currently under development. Communicate private well results and other follow up action within 96 hours of sampling.
- Develop a demobilization plan for next operational period.
- Long term planning for mine ops for Silverton and San Juan County (including community outreach).
- Implement medium term river monitoring plan with contractor per their scope of work.
- Ensure the coordination of CDPHE's notification system with monitoring contractor to implement event specific sampling.

1.3 Critical Resource Needs

All resources are being tracked by the Resources Unit. Resources for the response continue to be ordered as needed to fill critical resource needs.

1.4 Strategic Considerations

United group of subject matter experts to advise policy makers.

2. Current Activities

2.1 Operations Section

2.1.1 Response Actions to Date

A Colorado Unified Command (UC) post in Durango was established. The UC includes EPA, State of Colorado Office of Emergency Management (OEM), Southern Ute Indian Tribe, La Plata County, and San Juan Basin Health Department. The Ute Mountain Ute Tribe and San Juan County CO are also in regular communication with Unified Command. The EPA Regions 6 and 9 have established incident command posts in Farmington, New Mexico that cover New Mexico and the Navajo Nation response areas. A JIC was established and is providing support for both the UC and the AC.

The EPA is continuing property assessments and mitigation as needed.

The EPA continues taking daily residential well samples as requested and Animas River water quality sampling. The EPA sample count by media for 8/16/2015 is provided in the following table:

Sample Count for 8/16/2015			
Matrix	SampleDate	Number of Samples Collected	SampleType
Potable Water	8/16/2015	36	Field Sample
Surface Water	8/16/2015	7	Field Sample

Call center totals are provided in the following table:

	8/16	To Date Total
Well Water Test Scheduling	6	344
Water Concerns	0	104
Health Concerns	0	31
Recreation	0	20
Ecological Concerns	0	17
Livestock/Irrigation	4	23
Tourism/Media	0	52
Volunteer Offers	0	21
General Concerns	0	120
Daily Totals:	10	732

Total calls received at the Call Center through Sunday, 8/16/2015 is 732.

Currently all irrigation ditches are open and available for irrigation use.

Non-Potable water distribution as of 8/16/2015:

Total deliveries: 46 (repeat deliveries)

Approx. 141,480 Gallons

There was only one delivery to the Durango Nursery yesterday.

This was the last day for delivery of non-potable water as there is no longer a need for non-potable water delivery.

Potable water distribution:

Deliveries continue to be made to three locations.

Stakeholders:

- **Single Family Home cisterns.**

- Multiple family homes on neighborhood cistern.

Other Operations:

The EPA has set up pumping and filtration from river to fill fish ponds at one location using two 4" dry prime pumps.

1120 cases of bottled water have been purchased to hand out to community. Bottled water is available at the UC/AC facility for pickup by community members.

The CDPHE, and public water systems regulated by CDPHE in the impacted area, are taking raw and finished water samples to monitor water quality. City of Durango in coordination with CDPHE resumed pumping water from the Animas River for their water treatment plant on 8/15/2015.

CDPHE has staff in area and continued collecting the Animas River surface water and sediment sampling. Also continued outreach to public water supply system operators.

Gold King Mine Site

The EPA continues to operate and work on optimizing four treatment and sedimentation ponds at the mine site which are treating water by lowering acidity levels and removing dissolved metals. **Heavy rains on 8/16/2015 resulted in murky water in Cement Creek and caused difficulties in the road stabilization work. The road stabilization work continues today.**

Flow from the mine through the morning of 8/16/2015 is shown in the following chart.

Treated water from the last treatment pond is discharging into Cement Creek. Flow data out of the mine is being collected manually two times per day. Water quality data is being collected at the influent and effluent of the treatment system as well.

2.2.1 Anticipated Activities

The EPA will be taking five surface water samples on 8/17/2015 as follows:

Cement Creek – 1

Animas River upstream of confluence with Cement Creek – 1

Animas River downstream of confluence with Cement Creek – 1

Animas River through Durango – 2 (Baker's Bridge and River Road)

The EPA also be conducting well water sampling as needed and calling those residents sampled to provide the analytical results. For residents that had well samples exceeding drinking water standards in the wells will be resampled at both the tap and at the well.

On 8/18/2015 the EPA and CDPHE will be assessing the upper Animas River through the canyon.

On 8/17/2015, CDPHE has two sampling teams conducting public water supply and groundwater.

On Tuesday and Wednesday (8/18 and 19), the EPA will be accepting claims at the La Plata County Fairgrounds exhibit hall.

2.2.1.2 Next Steps

2.2.2 Issues

2.3 Logistics Section

To address IT concerns and improve communications, the AC and JIC swapped facilities on 8/16/2016.

A 15 minute Communications and IT disruption occurred at the ICP late on 8/16/2015 and was corrected.

2.4 Finance Section

Finance will be transitioning a new person in starting Monday to work in conjunction with the current finance section leader.

2.5 Other Command Staff

2.5.1 Safety Officer

On Sunday, authorization was provided for the mine operations to acquire two Utility Terrain Vehicles (UTV's) to replace 4x4 vehicles as the main mode of site transportation of visitors. All visitors will be required to attend an onsite safety brief, comply with the requirements, and remain in the vehicle at all times. Visitors will also be required to don level D personal protection and safety (PPE) consisting of a hard hat, safety vest, protective eyewear and

safety shoes. The elevation and dramatic change in weather are always of concern so be prepared.

2.5.2 Liaison Officer

No report.

2.5.3 Information Officer

There will be two PIOs in Silverton to support the mine site work.

There is a community event planned for this week. The announcement for this is attached to this SITREP.

The blog has received just under 500 hits in the last 48 hours.

2.5.4 Weather Forecast

Weather forecast for August 17 and 19, 2015:

DURANGO AREA

Today

Isolated showers and thunderstorms after 10am. Mostly sunny, with a high near 89. Light and variable wind becoming west 10 to 15 mph in the afternoon. Chance of precipitation is 20%.

Tonight

Isolated showers and thunderstorms before 1am. Partly cloudy, with a low around 53. West northwest wind 5 to 10 mph becoming north after midnight. Chance of precipitation is 20%.

Tuesday

Sunny, with a high near 85. North wind 5 to 10 mph becoming west northwest 10 to 15 mph in the afternoon. Winds could gust as high as 30 mph.

Tuesday Night

Mostly clear, with a low around 49. North wind 10 to 15 mph, with gusts as high as 30 mph.

SILVERTON AREA

Today

Scattered showers and thunderstorms, mainly after 11am. Partly sunny, with a high near 73. Light and variable wind becoming west 5 to 10 mph in the morning. Chance of precipitation is 40%.

Tonight

Scattered showers and thunderstorms, mainly before 11pm. Partly cloudy, with a low around 40. Northwest wind 5 to 10 mph. Chance of precipitation is 40%.

Tuesday

A slight chance of showers and thunderstorms between noon and 4pm. Mostly sunny, with a high near 69. West northwest wind 5 to 10 mph increasing to 10 to 15 mph in the afternoon. Winds could gust as high as 30 mph. Chance of precipitation is 10%.

Tuesday Night

Partly cloudy, with a low around 39. Northwest wind 10 to 15 mph decreasing to 5 to 10 mph after midnight. Winds could gust as high as 25 mph

3. Participating Entities

3.1 Area Command

The AC includes EPA Regions 6, 8 and 9, through the three unified commands: Colorado UC, New Mexico UC, and South West UC. The EPA Region 6 is working closely with the New Mexico Environment Department (NMED) and the EPA Region 9 is working with the Navajo Nation. The AC is completing daily Executive Summary updates on AC activities.

3.2 Unified Command and Cooperating Agencies

The UC includes EPA, State of Colorado Office of Emergency Management (OEM), the Southern Ute Indian Tribe (SUIT), and La Plata County. The City of Durango, CDPHE, and the Ute Mountain Ute Tribe are Agency Representatives. San Juan County is an Agency Administrator.

The SUIT continues water delivery. As a proactive measure, the SUIT is installing reverse osmosis on tribal residential kitchen taps. If well sampling results show any concerns, additional actions will be taken.

US Bureau of Reclamation (USBOR) is conducting road stabilization in and around the mine site.

The City of Durango and the Ute Mountain Ute Tribe are involved through via their agency representatives. San Juan County is an Agency Administrator.

The EPA Region 8 is coordinating with Agency for Toxic Substances and Disease Registry (ATSDR) in response to public health concerns/questions associated with the mine waste plume. ATSDR has been in communication with local health officials at San Juan Basin Health Department and San Juan County Public Health in Colorado. Public health questions should be directed to these local public health organizations.

4. Total Personnel On Incident

Gold King Mine Release 2015	
	08/16/2015
Group	Number
EPA @ REOC	0 (24 on call)
Contractors @ REOC	1
EPA in Field (R8)	20
Contractors in Field (R8)	30
EPA Laboratory	0
Contractors Laboratory	0
USCG	3
ERT	1
Subtotal EPA Region 8 Resources	79
Colorado OEM	3
Southern Ute Tribe	6
La Plata County	15
San Juan County	3
CDPHE	10
Southwest IMT	6
City of Durango	12
Durango Fire	2
San Juan Basin Health Dept.	5
Ute Mountain Ute Tribe	1
US Bureau of Reclamation	1
US Bureau of Indian Affairs	1
Grand Junction Fire	1
Mountain Studies Institute	1
ATSDR	1
Total	147

**Personnel working at the Colorado (Durango) Unified Command Post on 08/16/15
(Does not include Area Command Personnel):**

Position / Section	Number of Personnel
Unified Command	6*
PIO	9
Safety	2
Operations	2
Planning (incl SITL, ENVL & RESL)	8
Logistics	4
Finance	1
Liaisons	4
Agency Representatives/Administrators	1
Total	37

*One UC is located at the Gold King Mine site

5. Definition of Terms –

ATSDR= Agency for Toxic Substances and Disease Registry

EPA = United States Environmental Protection Agency

CERCLA = Comprehensive Environmental Responsibility, Compensation and Liability Act

CDPHE = Colorado Department of Public Health and Environment

USGS = United States Geological Survey

UC = Unified Command (Comprised of Southern Ute Indian Tribe, La Plata County, San Juan
Basin Health Dept, EPA, State of Colorado OEM)

UCP = Unified Command Post

AC = Area Command (Comprised of EPA Regions 6, 8 and 9)

NMED = New Mexico Environment Department

BIA = Bureau of Indian Affairs

BOR = Bureau of Reclamation

COEM = Colorado Office of Emergency Management

CDPW = Colorado Department of Parks and Wildlife

SWIMT = South West Incident Management Team

MCL=Maximum Contaminant Levels

MSDS = Material Safety Data Sheet

PPE = Personal Protective Equipment

USCG = United States Coast Guard

UTV= Utility Terrain Vehicle

ERT = EPA Emergency Response Team

REOC = EPA Regional Emergency Operations Center

6. Additional sources of information – <http://www2.epa.gov/goldkingmine>

Attachment: Community Event Information

Event: Love the Animas

Joining in and supporting the Event "Durango is back - River and Bike Parade", Mild to Wild wants to show our love for the #AnimasRiver and our appreciation for the community support.

In celebration,

1. We have 2 boats reserved for local officials and media. Please call Mild to Wild to reserve your seat (970.247.4789).
2. We are also donating 40 seats in rafts to the 1st 40 reservations. To reserve your seat: <http://bit.ly/1ffVXLs>
3. We will be facilitating private boaters and help manage congestion by providing people shuttles. We will be making loops from Four Corners & Santa Rita Park to 32nd or 29th Street from 4:30pm-5:30pm and 7:30-8:30pm.

Thanks again for all your love and support. The Animas River really is the heart of Durango and impacts us in more ways than most of us thought! If you have your own boat, the parade starts at 5:30 pm. If you prefer to show your support via the riverside bike path, join in by foot or bike. Let's show the world how beautiful Durango is, how lucky we are to live here and what a beautiful recreational and adventure waterway the #AnimasRiver is.

Date: Tuesday, August 18th

Time for event "Durango is back - River and Bike Parade: 5:30 pm at 32nd, 29th or anywhere on the bike path.

Meet time for Mild to Wild's Raft Trip "Love the Animas", join us at Mild to Wild at 4:45pm.

Post parade: Head downtown to support our businesses there!

Spread the word! #AnimasRiver #LoveRiver #VisitDurango #LoveTheAnimas
